Foreword

The trade statistics in this publication are derived from a computerized series of partner-country data, which are automatically updated. The methodology for this program is described in appendix A of CIA, ER CIT 79-1001, *China: International Trade Quarterly Review, First Quarter, 1979*. Unless otherwise noted, Chinese exports, imports, and trade balances are valued free on board (f.o.b.) at the port of origin. The most recent quarterly estimates are made with about 75 percent of the trade having been reported. Because of analysis of the variance in past trade shares, we expect the final figures to differ from our estimates for the current quarter by less than 2 percent for exports and less than 4 percent for imports. Earlier quarters, for which we have more information, are expected to change only marginally.
